PROJECTS

Hotel Booking System

February 2022

Developed in React this is just an overview of management in hotels. The project is aimed to maintain the day-to-day state of admission/vacation of Residents, room details, etc. This application will help the admin to handle customer information, room allocation details, Payment details, etc.

TRAVEL HILLS
October 2021

Travel Hills is a travel blog page that helps the user to find about different locations in north India, from temples to places of attractions, it covers everything. It can further be developed into a booking website which can be used for booking cabs, hotels and tour guides on trips.

META CRYPTO APP
January 2022

A React App that displays the stats of the top crypto currencies and allows user to know more about all the top 100 cryptocurrencies. User can read news and get information regarding cryptocurrencies based on filters.

E-COMMERCE PWA
September 2022
A NextJS PWA App that displays the products under various categories and uses state-management tools like Redux, to maintain and update the cart state. Contains dynamic pages which forms the complete architecture of an e-commerce store.
